

Jack Campbell-Smith

I am a results driven and problem solving developer looking to start my career in software development. During a successful career in content delivery and management, I discovered my passion for programming. I am highly self motivated, a fast learner and over the last year I have dedicated enormous focus to developing my coding expertise. I am looking forward to using my strong skills in critical thinking, organisation and attention to detail towards an exciting new challenge.

SKILLS SUMMARY

Javascript

- Built a number of apps and functional elements with demos available on my github
- Proficient with Vanilla JavaScript and React
- Intermediate Node.js
- Proficient with HTML and CSS
